

ABSTRACT

HUMAN AKT-3

- 5 There is disclosed a nucleic acid molecule encoding
human Akt-3 protein or a functional equivalent or
bioprecursor thereof comprising the amino acid
sequence illustrated in Sequence ID No. 3. The human
Akt-3 protein itself also forms part of the invention.
- 10 The nucleic acid molecule and the human Akt-3 protein
may themselves be used as medicaments, or in the
preparation of medicaments for treating cancer, in
their own right or in the form of a pharmaceutically
acceptable carrier, diluent or excipient thereof.
- 15 Further disclosed are methods of identifying agents
which influence the activity of a human Akt-3 protein.
